

### **3.7 Sample size:**

According to slovin,s formula

$$n=N\sqrt{1+NE^2}$$

If N=Population

n= sample size desired?

E= Margin of error (0.05)

$$n=N/1+NE^2$$

$$n=250/1+250(0.05)^2$$

$$n=350/1+350(0.0025)$$

$$n=250/1+0.5$$

$$n=250\sqrt{1.5}$$

$$n=166$$

The sample size is 166.

### **3.8 Ethical consideration:**

Permission will be taken from the ethical committee of the Lahore School of Nursing, University of Lahore, to carry out this research. Participants will be informed about the purpose of study; the right of participants will be protected by Code of Ethics. It will be assured to every participant. That data will be keep confidential throughout whole study after written consent of participants.

### **3.9 Data collection instrument / tools:**

Questionnaire will be used as a data collection tool. The questionnaire adopted from the (Everitt, Landau, Leese, & Stahl, 2011).There are two parts of this questionnaire.The first part consists of demographic data and second part consists on the liker scale contained question regarding the dimension of higher education quality, which are dependent variable .second part of the questionnaire contained questions regarding students' socio-economic and background related questions, which are the independent variables.

### **3.10 Data analysis method:**

The data will be analyzed by using on SPSS version21. Descriptive statics will be used to represent in the form of figure, Table's frequency and Percentage. The significance level for all statistical analysis will set at 0.05.Used binary regression test.

### **3.11 Study duration:**

The Study will be conducted from January 2018 to May 2018,
