

To conclude, several E-learning models are in existence and their approaches and activities can furthermore be assessed and compared. Moreover, a hybrid type of model can also be applied there by taking into consideration the effective review and evaluation approach of LCM is coupled with the swift, robust and easy going approach of ADDIE model for a successful E-learning design and implementation.

Acknowledgment

The authors wish to thank their able Rector, Chief Librarian and Dean School of Science and above all the reviewer. This work was supported in part by a grant from the **Tertiary Education Trust Fund (TETFund) Nigeria**.
