Legend of figures

Fig.1: Example of diode lasers

Fig.2: Different wavelengths of the diode laser

Fig.3: Tissue absorption of laser radiation (including diode laser)

Fig.4.a: Clinical manifestations of tissue inflammation in relation to the 14 and 15.

Fig.4.b: Bone lysis around the two implants

Fig.5.a: Incision of the lesion with a scalpel

Fig.5.b: Mechanical debridement of the lesion with a curette

Fig.6: Application of H₂O₂ (leave for 2 to 3 min)

Fig.7: Activation of the fiber and power adjustment

Fig.8: Laser application

Fig.11: Laser application
