ACKNOWLEDGEMENT

This work would not have been possible without the support of generous people whose time and assistance were unconditionally given to the researcher. Indeed, the fulfillment of this endeavor was indebted to them.

Words of gratitude to **Dr. Angelita F. Ago**, President of Ago Medical and Educational Center, for her utmost support to the AMEC-Graduate School. Likewise, I appreciate **Dr. Nilo B. Romeroso**, Dean of the AMEC-Graduate School, for his assistance and valuable feedback throughout this study.

Similarly, the researcher is thankful to **Dr. Ma. Teresa G. De Alban**, his thesis adviser, for the thoughtful considerations and guidance. Her support, precious insights, and enthusiasm have been the researcher's inspiration in accomplishing this task.

It is worth mentioning the bright ideas of the panel of evaluators, led by **Dr. Maria Bernardita A. Palacio**. Sincere appreciation to **Dr. Marilyn A. Daguno**, **Dr. Richard L. Bartolata**, and **Dr. Celerino S. Palacio**, members of the committee, for their constructive criticisms in the course of this study. Their expertise and brilliant suggestions truly enlightened the researcher that further improved this study.

Moreover, the researcher is grateful for the cooperation of the participants in this study. The honest responses and full cooperation from selected students of the Junior & Senior High School Department and College Department of Sorsogon State University, during the Academic Year 2022-2023, served as the main respondents of this paper.

Also, the researcher is grateful to Prof. Abner L. Delloso, Prof. Aldin G. Labo, and Engr. Noel G. Benavides, his colleagues who unconditionally shared their precious time and effort. Further, the researcher appreciates the Office of Student Development Services and Health Services Unit of Sorsogon State University. Their utmost support and understanding formed a significant part in the completion of this study.

Heartfelt appreciation to the researcher's siblings, Cecille and Tonette, who have given him enough reasons to just keep going and pursue this venture. Their well-wishes and prayers are deeply treasured.

He is also grateful to his nieces and nephews, Dane, Chesca, Therese, Cassy, and Christian. They made this arduous journey a lot lighter with their cheers, laughter, and giggles.

Sincere gratitude to his in-laws, Ama Jun, Mama Delia, Arbee, Athan, JR, and Chai. Their abundant support and overflowing love keep the researcher hurdle every step of this writing journey.

More importantly, he is forever indebted to Jean Carrol C. Antonio, his spouse, and lucky charm, who has always been a constant source of happiness and inspiration. Her unconditional love, support, and encouragement are beyond comparison.

The researchers' kids, Jaze Francis, and Jean Francine, are the greatest reasons for the researcher to wake up every day with a happy and grateful heart. Their hugs and kisses are enough to push him to go further and strive harder.

Words are not enough to express thanks to his parents, Mr. Danilo A. Antonio and Mrs. Evelyn O. Antonio. Their unflinching love and unending support continuously nurtured him and provided the strength that helped him surpass life's challenges.

To those whose names might have been unintentionally forgotten, and inadvertently omitted, but to whom the researcher owes a lot, wholehearted appreciation is given to all of you.

Above all, this humble work is offered to the glory of the Almighty God. The provision of wisdom, courage, and good health are all HIS graces to the researcher. With HIM, everything has been possible.
