

However, regardless of these impediments, Nigeria has recorded considerable progress in the use of the new ICTs in different sectors. Many Nigerian media for instance, are now on the Internet. The NTA, AIT, MBI, Channels TV, RayPower FM, Cool FM, Rhythm FM and a few others are now embarking on satellite broadcasting. With this, Nigeria is now launched into the globalization scheme. The world can now hear, see and read us through our own media perspectives. This is a good development.
