## 5.0 Discussions

The challenges faced by learners were attributed by poor pedagogical content knowledge by teachers as a lot of teachers inside correctional facility did not attain tertiary education. The rules and regulations of a correctional facility did not allow learners to practice home work as mathematical instruments were seen to be a weapon that can be used to stab an officer or a fellow inmate. The inmates also were not motivated in promotional stages to stages such as red band, blue band or special stages. This gave prisoners no hope of being released hence felt demotivated to continue schooling while in prison. The issue of failure to provide teaching and learning aid by the Zambian government through the Correctional department was a great factor to the poor performance of learners.
