

control methods.

## Acknowledgment

First of all, the author wishes to express high gratitude to his parents for their encouragements throughout this study. The author is also deeply grateful to Dr. Soe Win, Professor, Department of Electrical Power Engineering, Yangon Technological University, for sharing his valuable experience. The author offers her special appreciation to Dr. Soe Soe Ei Aung, Professor, Department of Electrical Power Engineering, Yangon Technological University, for her essential suggestion and continuous supervision for this paper.
